

Dream Time	27 + 2d
Identity	Pivot Bruh
What	<ul style="list-style-type: none"> • Productivity Paradox • 4 hour delivery
So What?	Know what to say no to when consulting [Maslow's] + [social media]
Stakeholder	Richards. Plus

Approach: Cambridge Analytica was a sample of everyone's social transactions. We are represented by someone in there regardless of if we use social media.

Formation:

- Cambridge Analytica
- Demographics collected
+ likelihood of paying back debt in 2ndary markets
- Social media spun off to Apache
- Information Management Improved
- Pivot to Support Machinists
+ daily missions to existance
- Resolve Productivity Paradox

Execution:

Hadoop is an example of an innovation spun off from social media. During Cambridge Analytica, even those who did not use social media were breached of their likely social transactions. Demographics collected reinforce likelihood of regarding debt (cf Hypothesis). We do not know ethnicity from dialect.

The productivity paradox is still very much in play; greed blinds us to the fallacies that persist in information management.

NASA 2015 rejuvenation layed out objective of spreading democracy to infinity and beyond; but, starting in the cislunar region.

Pivoting away from [App Development] \Rightarrow [Maslow's] + [Social Media]
means supporting mechanists doing daily missions

to replace the interchangeable parts in the ["Alibaba + Amazon"] supply chains in the cislunar region, so we can have 4 hour deliveries.

Dream Time	27+3d
Identity	Don't care what you call me
What	<ul style="list-style-type: none"> • Belongingness Layer • Constructed identity
So What?	Having positive reinforcements when embodying a role will reinforce those sets of behaviors.
Stakeholder	Greg Neno

Approach: I asked 20 people "what do you need to feel like you belong?", and wrote a poetry book about their answers

Formation:

- varying answers based on role in society
- met writer from UA : Stacey
- taught me that putting forth a constructive (ed) identity opens up doors

Execution:

So many folks put forward sexuality as their constructed identity. This is weakness to the root Shakra. Those who put forward occupation are putting forward the desire to "make money".

The I Ching teaches of the many theatres we are a part of. When our selective attention draws out a particular play, we can give wholly to those individuals, supporting characters, and houses.

We have layers of belongingness to get through when we interweave into a new solidarity fabric.

Reflection can be nostalgia: a sickness in the dream world.

How does one keep integrated their previous communities? It is when we have rapid shifts that each clockwork tick passes.

This poetry ends with me saying: as long as you call me for dinner

Dream Time	27+3d
Identity	Service Science : Dam Theory
What	<ul style="list-style-type: none"> • Batching drinks • River released for recreation
So What?	Aim to reduce engagement entropy
Stakeholder	Californians

Approach: Studied Queuing Theory in 2018 to understand Markov Chains better. Dam theory can be related to batching of mixed drinks - which is about to blow up in CPG

Formation: once the code gets cracked.

- Queuing also relates to shop floors
 - + Assembly line
 - + lean manufacturing
 - + Toyota way
 - + conways / parkinson's
 - + Murphy

- Engagement is the objective → ↓ entropy

- Batching drinks

- Batching water at the river
+ recreation

- Fluid Queue

Execution:

Keep the drinks flowing!
Smoke 'em if you got 'em
let the river out
so I can play
on silicone island
as a lower river junkie
and deepen into the layers
of relaxation
with watery beer
and knee high water
a sun hat,
Pull up to sand bars
but ~~avoid~~ avoid the ones I don't want
remember the clear path
once
and watch the river height
from the tudy line,
water set out ~~to~~ for us
up Dam
so 15 feet portions
may be skinned
with 6 inch clearance jets

Dream Time	33-3d
Identity	Service Science: Volumetrics
What	<ul style="list-style-type: none"> Volumetrics of $PV=nRT$ Social Services are a privilege
So What?	Aim to Reduce Engagement Entropy ^{KPI}
Stakeholder	Service Industry Members in Community

Approach: Studying service science brought an understanding of volumetrics regarding engagement and benchmarks. Looking at a particular community from volumetrics.

Formation:

- $PV=nRT$ per volume
 - $\Rightarrow n \downarrow \rightarrow T \uparrow$
 - $\Rightarrow V \downarrow \rightarrow T \downarrow$
- Need for insulation with Family RM
- Comparative Advantage cannot be achieved with a particular family
- Move the needle with Benchmarks / Proofs of Concept
- Bartenders understand this
- Renter's economy SAAS
- Social Services are a privilege
- Services not entitlements

Execution:

Social Services are privileges. Expressing taste will always be a thing. How much our priorities were disrupted by cultural consumption is where the objectivity lies in experience of beauty; this is relative to the patterns of behavior.

As the density of households goes down, but pressure and volume is stable, temperature goes up. This is due to more transactions per time, and the heat given off from friction.

As volume goes down, but pressure and density stay the same, temperature ~~the~~ goes down.

Attrition is calculated on each organ in each volume, in modern warfare.

KPI is to reduce Engagement Entropy

Dream Time	33-3d
Identity	Plaintiff Postures
What	<ul style="list-style-type: none"> Judgment day is joyous All Demeanors Matter
So What?	Avoid narcissistic subconscious growths from logical viruses... even if they comfort the soul
Stakeholder	Perry Dine

Approach: Judgment day is considered "joyous" in Psalms.

This is because our grievances and aunts will have their cases heard. Of course, we are fucked; but, it is narcissistic to not think that it will be good for the community

Formation:

- Even the petty claims will be heard
- Day as anything but joyous is narcissistic
- Think of Thromone also being straightened out about being judgemental about ~~the~~ demeanors that are mis
- If every friend has more friends than you, → Friendship Paradox and they have cases to be heard...
- Nature abhors a vacuum
- Shrodinger's Fish

Execution:

If every friend has more friends than you, and
they have cases to be heard, judgment day is more joyous
than detrimental. Although petty claims will often have to do
with demeanors that scared / tipped upon fears, these are valid for
the ↑ work / ↓ time individuals.

Money is wasted on the old, love is wasted on the young

Slow is smooth, smooth is fast
Take a deep breath from lungs

Try to let go of past

but hold on

"bless my soul

bless yours too

got so much to see

got so much to do."

Shake Alabama Neaderger

etch that out of your iceberg

as trees grow from the iceberg

and pray for the 20%

of irreducible recurrent behaviors

people go into

from your negligence
