

Pitching Season

2025-01-14

align^{ed}~~ing~~ with priority
and now ^{to} ~~this~~ pitching season
let's hear your thoughts, and hear mine too
let's focus on our reason

it's hard to focus on the cause
there's many cause in type
and some are greener fielded buds
though some are swollen ripe

so pitch to me your thoughts on work
that this year we can do...
pursuing ^{work} ~~work~~ of yours and mine
~~will~~ will complement our crew

so here's to pitching season : cheers!
and here's to many thru the years!

Pitching Season

Physics of attention

2025-01-17

{ the laws of physics don't quite work
with people in relation
~~the~~ if you ^{performer} ~~kill~~ on center stage
don't jump right to elation

{ for people will internalize
or targets we will take bread
not always ^{will} ~~on~~ ~~you~~ the ~~not~~ you're give
with ~~in~~ in my own back

{ for gravity of other ~~thoughts~~ things
will pull our thoughts to those
not always are the thoughts we think
the thoughts we'd ~~thoughts~~ to choose

{ and entropy diminishes
the impact of our love
as heat will dissipate from hearts
~~on~~ ~~the~~ attention's also tough
your impacts equal opposite
may not within attention set

Forceful Grace

2025
-01
-17

oh
how may we attention grab
within this pitching season?
for some: they reason para the feels
for others: feel the reason

our organs resonate in close
proximity to you and yours
in ~~its~~ closeness heart strings feel a strum
and from ~~these~~ ^{heart} strings our music pours

you're ~~the~~ instrumental to this place
each time I see you smile
is when ~~my~~ ^{my focus} attention suffers grace
you linger for a while

and as I tudge back ~~to~~ my path
I'm left a bit forsake
for this damn memory is ~~weak~~ weak
priorities you take

so now I socialize my taste:
your beauty's lain ^{life} ~~my~~ force to waste

A tender gear

2025-01-19

{ the gear that frees within my box
is as that of the second hand
what was a clock that ~~thick~~ minute ticked
is now ajoint ~~with~~ unlocked to smoothly fan

{ the seconds, freed now of their rust
though I must follow up with grease
this fleshy gear hath now a spin
minutia of god's glory teased

{ as now I see the moments fresh
in faces of the passorby
and ~~of~~ ^{toward} the global consciousness
enrapturing our love on high

{ ~~that~~ was due to reading parables
the tips of spirit in my view
I look for cosmic consciousness
within the framework of this zoo

{ what once was gear ajoint like glue
by grace of God has broken through

La Primavera

2025-01-19

{ La Primavera presence pure
solidify my budding dream
the seasons sanctify by deed
and value releases ~~phases~~ pheromone flame
for sprites and imps and elves all dance
within our forests, though not seen
my lineage is from these woods
immortalized ~~was~~ ~~at~~ our dance has been

{ in paintings of the Renaissance
and also by the athlete types
this love is shared sorceries
~~shared~~ ~~with~~ ~~the~~ ~~shared~~
ajoint with love's fraternal types

{ The dance of primavera skips
around the pole of may and june
I will have hoped this quicker came
though at that time spring came too soon

{ but in these day dreams I forget
its in your eyes that ~~season~~ spring begets

Helen's Tease

2025-01-19

{ ought me to aim for higher love?
a pollick in the fields
or pleasant amongst the sprites
on autumn's harvest yields

{ we thank that ripened fruit ferments
that ~~brined~~ produce brined preserved
that ~~long~~ past the point, fruit may return
* fermented hearts are served

{ it's hellenistic vernal art
that orients us to our best
as social creatures pleased by toil
it's toil most ~~rest~~ which pleases rest

{ and on our primavera days
where marriage may-pole centers groove
the greek have influenced our schools
they aim ~~at~~ to paintings in the Louvre

{ so ~~when~~ cast your lots on current hosts
however ~~when~~ renaissance may boast

Our skin listens

2025-01-20

{ La primavera sings to me
from time ahead in coming spring
by winter's freeze, our hearts on loan
to lend hearts back and credit spring
we insulate now from the cold
with promise to return what's ribbed
~~as a sign from~~ ~~that~~ relieves
the distance of the sun
though seasons are all built on fifts :

{ that seasons will remain as such
this is omission ~~on~~ repeat ^{for us}.
~~this nature~~ ^{let} nature ~~has~~ indicate
the coming ~~that~~ weather we're to meet

~~the~~ ~~as~~ ~~an~~ you intercept my sunward gaze

{ I ask you move out of its rays
for listen I with open skin
to where our tilt positions days

{ cause really cosmic time resolves
what seems omitted focus solves

Regimented Behaviors

2025-01-21

{ behaviors in an order operation c
are thought to be determinant
a paradox that choices made are thin
are lock in step as permanent

{ or choices made in regiment
are freed by will, as etched from stone
as ~~made~~ ^{life} ~~was~~ is like a piano in sustain
for life sustains with pressure on the tone

{ it's ^{like} ~~is~~ the ~~middle~~ statement of procedure pure
where choices limited reduces risk
though eggs or chickens predesence unknown
what's known is first came not the chicks

{ so what comes next in patterns of remiss?
relax from constant task, we ask relief
relief the leisure time from ~~the~~ marble space
and listen to the sun with skin like leaf

{ so stick to plan and do what is you meant
relieve your fellow folk with actions regiment

Nutrient to live

2025-01-23

{ when nutrient I can take on more
not just ^{with layer} insulation
is easier to chip away the cake
from issues ~~with~~ resolute ablation

{ solutions melt away what can dissolve
to make our problems seem less resolute
and in the process we relieve from stone
our principles have pressed away the dissolute
from ~~chakra~~ root up through our axis ^{core} ~~manu~~
the nutrient flesh breathes with the air about
its when the entropy is lessened: aims are clear
our calling pulls us in without the need to shout

{ to let us nutrient the ones we love
but let us ~~not~~ live not sole to nutrient
it's shedding waste ~~waste~~ that helps us optimize
and for our fellow folk ^{relieve} ~~manu~~ in temperment

{ so nutrient to live, not other way around
~~though~~ but know ~~that the world is changing~~
to reassess upon our calling's sound

Let 'em know

2025

-01-24

{ invaluable are moments there
with you my elder friend
I learn about the paradox
of starting at the end

{ we're close in team because of this
our written verse: a way to bond
and ~~from~~ your process I have learnt
bout how your writing I am fond

{ we may be demographic diff
an intersectionality
and both are valid stance on ~~the~~ life
and both a ~~could~~ ~~valid~~ true reality
for ~~the~~ how we would ~~be~~ not about

{ each other's struggle in this head
it's how jah set ~~the~~ earth a'spin
that weighs on us with weight like lead

{ so let's reveal - but not as phony -
for younger folk our testimony

2025-01-26

Nature abhors a vacuum

There's nothing much left ...
bing on the boredom
let it settle
with confidence
when I take the next step
down the stairs
with my eyes closed
harnessing this third will
wrangling back my beam
is the *modus operandi*

the impetus of responsibility
lies somewhere within and behind my chest
my flesh fills the gap
a constant becoming
being forward
up and down
left and right ...
my whiny is heard a mile away

poet: William Blake

Qazi Monk Gantt Charts

2025-01-28

I put on a mesh headset
and was immersed!

so cool

to play a game...

but how could I not think about
choosing a naked woman to immerse with?!
^{is this an option, yet?}
I'm not above my monkey brain!

I have to stay away from this...

I'd rather push the broom
and scrub ~~the~~ bugs from the sewers
to maintain the ~~matrix~~ matrices

as a ~~quazi~~ quazi monk
with free time

to be in nature with others...

though, who's to say "inside"
is not nature?

as open-door villas

with ~~rolling~~ waves of twigs rolling into the mud room
is much healthier than plastic wrapped ^{seams} seams - detailed...
one pair of flip flops - healthier than slippers at each door

yet another gift

2025-01-28

It's time ~~el~~ learn fire logic
a gift you have gave
yet again
ahead of schedule

first most the resort high school
with ~~follow~~ schoolmate girls ~~are~~
wearing just jeans and white V-necks
culture shock
really, intra refuge from recession

second, AI

35 years ahead of everyone

third, Colorado ^{river} ~~max~~ boating
low river junkies - our brand
fourth, is fire logic
yet another gift

for me ~~to~~ lessen awareness
the ever more aspects of life
that are taxed
out of threat of incarceration

Friend at midnight

2025-02-01

in coxise strong hold

4:30 on a brisk morning

woken up by a rat
internal heat had just reached a peak
tension in my skin

head ~~fac~~ ~~point~~ point from camp
certain I heard a congar
had to get up

was at my most peaceful
now at my most alarmed

I would recognize a rat in camp?

It took millions to get me to this point

such a waste of tax payer dollars

to have ^{me} ~~my~~ put down

humpf

my "friend at midnight"

said "wrong rat" from tent

New Taxes

2025-02-01

entrusted with talents
and ~~yet~~ though I am taxed
in that these are guaranteed
along with death

I am concerned my leaders
reapeth where they do not sow...
hard men

bottlenecking decision making
from handheld devices
leveraging my pattern recognition
and desire to "own" and "create" the trough
a new currency

similar to asking to get reach out of nest
lines set in the web
like spiders that lines

feeding from the trough
in saturated markets ~~lights~~ street lights
requiring I squint to see the stars

though, I may not see the same constellations as you
as dialect indicates ethnicity
we must listen to her express her needs ... with the "owns" and "creates"

Orion's Hermes

2025-02-01

we are made in the image
of Orion
although we see not the same constellations
he is there
with a β star dich
hanging towards the earth
with shoulders balanced on the same axis

we are beholden
to the geometry of the sky
not nearly the animals we attribute
to the sky lights
as closely as Orion
let's not saturate our skies
or at least write messages in them
perhaps on encrypted channels
so we can aim these apples anywhere
and sell banners
of coca cola or amazon
or your lover's picture

Compsite Dissent

2015-02-02

from number theory to culture
our privilege is that I may eat meat
and not self impose restrictions
that will hamper my ability to compete

how the scientific method of philosophy
was already applied in the epic poetry
what we consider religious texts
there are methodologies we can choose from
some contexts allow for reprieve
from self-aggrandisement ~~or~~
or self-deprecation

proving you can take one ...
from yourself ...

the compsite: I took more out of
than the compsite took out of me
we had a holistic conversation
which cochise will hold strong

Pitching Season Halt

2025-02-04

The pitching season comes to halt
at moment decision of mine own
this family has asked of me
to answer pitch from kin alone
my perspective is different
than those prosecuted by love
it is the ask of needs fulfilled
~~that~~ which brings us in to water deserts
and in cases
where the resources are plentiful
that we blind ourselves to the longer mind
it is the survivability of a synapse
that must needs come about
are we paid to deal with conway
or parkinson or murphy
in this flow of resources?
let the mud settle
and will fulfill what hermes must transmit

Sugarscape Pitches

2025-02-04

and as pitching season
fleeds into primavera
we are laying that line
to see who will nibble
and when we have so many options
as the sugarscape teaches
we vibrate in competition
of what is available
in our immediate vicinity...
as the conversations pertain not to any one
as the focus is on warmth
and winterizing our pipes
and asking the neighbor boy to check
to make sure our summer home does not flood
as the lines we wait in disrupt our priorities
so also does our various pitches
create an action potential
for our celestial clockwork

2025-02-05

a square deal

beer for wood
~~energy left~~

our sleep hygiene is quenched
as every day we must leave the house
to feel safe

in our relations

in our principles

for it is in sanctification

by burning through thought for
or Tak wood

that we find security

by the warmth of our companions

not as a clean transaction

but as that we may choose with whom we are indebted

when we are free
