| Dream Time	33-3d
Identity	What women want: Challenge the dream analysts
What	• Conservative force on Blooms Taxonomy • ~~Hierarchy~~ Hierarchy traversal
So What?	Sets context for interdependent anomaly detection and teaches how to setup a team
Stakeholder	Kelle

Approach:

Women want to draw: men up bloom's taxonomy, and women into a different vector of conservative force — up each bloom's core in the fields of evaluation

Formation:

Fields of evaluation
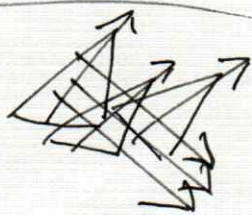

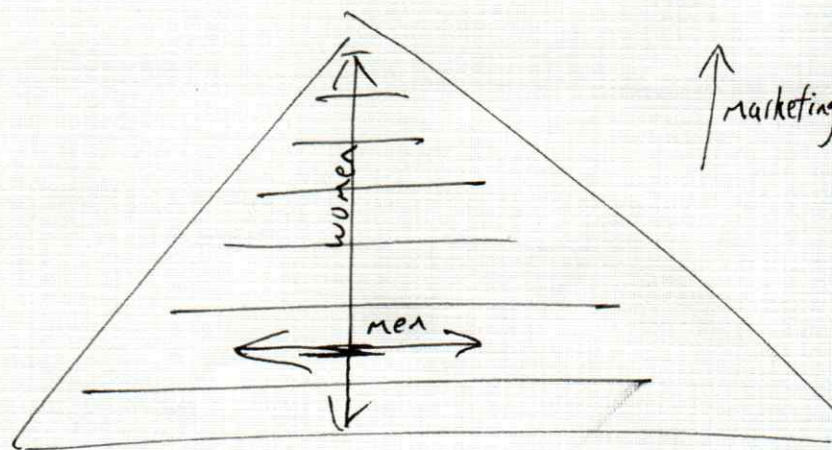

- Women draw men up bloom's taxonomy, towards evaluation
- women, being a conservative force in this orthogonal, compete for the direction
- Event Store at each tier of the taxonomy
+ Driven to fill out the RACI model, to elevate the event/anomaly
+ encourage curiosity about who can fill out the RACI

Dream #: 111

Execution:

What do women want? This has been a question ask by the best dream analysts. The conservative force up bloom's taxonomy is reinforced by women : who want us to move up the taxonomy with choices (time and money). Men fill out the horizontal tier/plane to define hierarchies to limit the choices of others.

This is a flesting out of the belief of mine that:

<u>Men hierarchialize to limit choice</u>
Women choose to create hierarchies

This needs to be adapted to

Women choose to enable hierarchical movement

One woman's root is another woman's fruit
One man's attribute is another man's entity
